# Intigriti collaborates with PortSwigger to support ethical hacking excellence

BY ELEANOR BARLOW · MARCH 11, 2026

## Intigriti and PortSwigger collaborate to reward hard-working hackers

Best known as the creator of Burp Suite, the industry-standard toolkit for manual web application security testing, PortSwigger is a UK-based cybersecurity company on a mission to help the world secure the web.

Today, their tools are trusted by over 20,000 organizations worldwide to detect and prevent cyber threats. To further support the cybersecurity community, PortSwigger is collaborating with Intigriti to reward high-achieving hackers with access to these valuable tools.

As PortSwigger's **Director of Research, James Kettle,** announces,

> **"We know Burp Suite Pro is addictive, that's why we've teamed up with Intigriti to provide proven bug bounty hunters with six months of Pro, for free. Enjoy!"**

## What are the benefits to the Intigriti hacking community?

Any hacker on the Intigriti platform who achieves 400 or more valid reputation points **in a single quarter** is rewarded with a free 6-month Burp Suite Professional license.

> **"Providing Burp Suite Pro licenses helps empower our community with professional-grade tooling. It enables researchers to work more efficiently, uncover deeper vulnerabilities, and spend more time focusing on impactful findings."**
>
> **Alex Olsen, Head of Hackers, Intigriti**

The purpose of this initiative is to reward hackers who consistently deliver high-impact web findings. By equipping our top performers with industry-leading tools, we enable them to work faster, hunt deeper, and surface meaningful vulnerabilities that make the web safer for everyone.

> **"The Pro license, in my opinion, upgrades not only the experience but also the depth and width of finding bugs because it lets me: automate repetitive checks, discover hidden content, run OAST tests, search large traffic sets, save and resume project state, and use the full Intruder workflow."**
>
> **Cristian Zot, Intigriti Ambassador**

## What steps and requirements are involved?

1. Intigriti conducts a **quarterly check** for researchers who have hit 400+ valid reputation, via the Intigriti platform.

2. The Intigriti team then runs through this list of remarkable hackers and verifies with each individual if they would like the license or not.
3. Confirmation is secured regarding detail sharing with PortSwigger.
4. Intigriti sends the details to PortSwigger, and the established researchers are provided with the license.
5. Hackers **will be eligible for a free 6-month Burp Suite license once per year**.

## How can Intigriti researchers get started?

**If you are a hacker already working with Intigriti:**

Then your reputation points are already being tracked! You will be eligible for a free license once you hit 400 reputation points in a quarter. Head to your account to view how many points you have accumulated so far.

**If you are new to Intigriti and would like to know how to get started:**

- Explore the platform
- Have a look at the public programs
- Join our community

And help shape the future of security.

## What's next?

Licenses are a huge value to our researchers, **but this is just the start!**

We are also collaborating with PortSwigger to enable both Burp Suite and Intigriti users in the form of challenges, events, and opportunities. So, watch this space, sign up to the Intigriti newsletter, view our knowledge base, and follow us on socials to stay abreast of upcoming opportunities with PortSwigger, and continue to celebrate and support our hacking community.
