Adobe empowers everyone to create through industry-leading platforms and tools that unleash creativity, productivity, and personalized customer experiences.

Starting September 1, 2026, Intigriti will be the new home of the Adobe Bug Bounty Program.

Why Intigriti and Adobe?

As AI reshapes how organizations build and ship products, security testing needs to keep pace. Intigriti's global community of researchers helps companies identify vulnerabilities across evolving product landscapes, giving them the confidence to innovate securely.

The collaboration connects Adobe's Bug Bounty Program with Intigriti's community of security researchers.

A partnership built for community

Stijn Jans, Founder and CEO, Intigriti, commented on the partnership, stating that

At Intigriti, we believe the strongest security comes from working alongside the hacking community. Our focus is on giving Adobe researchers an outstanding experience and supporting that community's continued growth. We are honored that they have chosen us as the new home for their Bug Bounty Program, and we see this as the start of a long and rewarding partnership.

Intigriti is looking forward to what this next chapter makes possible.

Actions for Researchers moving across and getting started

Create your Intigriti account ahead of September 1 so you're ready when the program goes live. Reports submitted before the cutover will follow Adobe's standard triage process.

[See Adobe's Security blog](#) for full details on timing and account setup.

About Intigriti

Intigriti is the trusted leader in crowdsourced security. Since 2016, the company has empowered the world's largest organizations to proactively identify and address vulnerabilities before they're exploited by cybercriminals. Harnessing the expertise of our researchers, businesses can detect vulnerabilities as soon as they surface, avoiding the costly damage of security breaches. Through our meticulous triaging process, commitment to legal compliance, and unparalleled customer service, we deliver the utmost reliability for our customers. Intigriti is proud to help industry leaders safeguard their digital assets and thrive in an ever-evolving threat landscape.
