

# New insightful resources

BY YANNICK MERCKX · MAY 13, 2022 · LAST UPDATED ON JULY 28, 2025

## Let's start from the beginning!

Bug Bounty, Continuous security testing... All relatively new terms and definitely the new way of improving security maturity. But how do you get started? The available information found online is often unstructured, inconsistent and the amount can be overwhelming. Therefore we decided to start from the beginning and create a bunch of well-structured easy to digest resources for you. These resources will help you to achieve clarity on how to overcome your cybersecurity challenges.

### New marketing resources in a nutshell

#### Watch Webinars

- An Introduction To Bug Bounty Programs
- Continuous Security Testing Through Researcher Incentivisation
- How To Reduce Risk of Cyberattacks Through Ethical Hackers

#### Discover new Datasheets

- Selfhosting a Bug bounty vs a platform
- Overcoming cybersecurity challenges
- Intigriti USP's
- Vulnerability disclosure program (VDP) vs Bug Bounty

#### Download our new Ebook

- A guide to six common bug bounty myths

 **“A wealth of information creates a poverty of attention.”**

## Watch Webinars

### An Introduction To Bug Bounty Programs

The need for modern, proactive security has never been more important. A simple yet proven method to protecting against cyber threats is to invite ethical hackers in. Watch this webinar to get a 60-minute introduction to bug bounty programs.

[Watch the webinar](#)

### Continuous Security Testing Through Researcher Incentivization

Ethical hacker incentivization is increasingly becoming a prioritized security method for CISO's in the UK. To get the most value from this strategy, watch and learn in our 60-minute webinar where we discuss best practices for success.

## Discover new Datasheets

### What Makes Intigriti's Platform Unique?

Our offerings cater to all organizations and for various levels of security maturity. But what makes us different? Download this short booklet to discover the many ways in which Intigriti outshines other bug bounty platforms on the market.

[Discover the Datasheet](#)

### Self-hosting A Bug Bounty Program vs Publishing Via A Bug Bounty Platform

Businesses can choose to receive and manage vulnerability disclosure reports themselves or publish and host through a bug bounty platform, such as Intigriti. Get a quick understanding of the key differences in our easy-to-read booklet.

[Discover the Datasheet](#)

### Agile Testing Powered by the Crowd

Read about bug bounty programs vs pentesting, bug bounty benefits and why it is so important staying one step ahead. A vulnerability reported and fixed is one less opportunity for a cybercriminal to exploit.

[Discover the datasheet](#)

### Vulnerability Disclosure Policy (VDP) vs Bug Bounty Programs

Creating a stress-free and sensical way for ethical hackers to disclose security vulnerabilities to you is critical. Intigriti offers both VDP and bug bounty program disclosure routes through the platform. Download this short booklet to understand the similarities and differences between them.

## What else is cooking?

- **We strengthened our password policy.** Passwords now needs to be at least 10 characters long and the new password can not be the same as the old password. Additionally, the password can not be the same as the Email address used for user login.
- **“Pre-Auth Account takeover/OAuth squatting”** is added to our general **out-of-scope** template. This means that we advise customers to add this to their out-of-scope by default.
- **We updated our cookie policy.** We made sure to describe purpose and lifetime of cookies in a little more detail. You can read all about [here](#).
- **Our Intigriti Corporate Policy is published** online. We want to make clear to everyone, companies, researcher and any other website visitor alike that Intigriti is operating according to some fundamental ethical and legal principles. This shapes a sort of “Code of Conduct” for employees but has been called “Corporate Policy” to avoid confusion with the researcher Code of Conduct. The Intigriti Corporate Policy is available [here](#).

## Fun fact

Statistically unlikely but **over 25%** of our **Product & Engineering team** are **born in May**, so there has been lots of cake this month!

Does the idea of working in a promising, flexible and fulfilling environment inspire you? Discover careers at Intigriti by visiting our [careers page](#) or following us on [LinkedIn](#). We look forward to your application!
