

# Bug Bytes #180 – Hacking Minecraft, exploiting SSRFs, a free scanner from Portswigger and our best bug bounty tips

BY TRAVISINTIGRITI · NOVEMBER 2, 2022 · LAST UPDATED ON MARCH 6, 2025

Bug Bytes is a weekly newsletter curated by members of the bug bounty community. The second series is curated by InsiderPhD. Every week, she keeps us up to date with a comprehensive list of write-ups, tools, tutorials and resources.

This issue covers the weeks from October 23rd until October 30th.

## Intigriti News

- [Our hacker portraits from this quarter, congratulations to @jfoolish\\_22, @roysolberg and @0xtavi](#) (bonus [0xConda's hacker portrait arrived!](#))
- [Breaking down our latest challenge](#)
- [Our best #bugbountytips](#)

## From my notebook

- [We round up 1337up0822 with The Paranoids, check this video out to see everything you missed from Antwerp in August!](#) – Shameless Intigriti promotion but this video is great to show off the energy in Antwerp when Intigriti and The Paranoids brought together the best hackers worldwide to hack, hang out and also see the Belgian GP!
- [Minecraft:HACKED](#) – This LiveOverflow series has really got me back into Minecraft oops but it's a great intro to game hacking and more generally what used to be called "creative use of game mechanics."
- [Playing on the LiveOverflow Minecraft Hacking Server – Hacking](#) and followed up with a write up of some of the challenges from the videos!
- [Registrations Open for IWCON2022 Version 2.0—the Online International Cybersecurity Conference](#)
- [Root cause analysis of 100+ DeFi Hacks](#) (shared by [@payloadartist](#), original by [Sun](#) and [XREX security team](#)) – Great resource if you are interested in DeFi hacking
- [What functionalities are most often vulnerable to SSRFs? Case study & Exploiting SSRF Using Export PDF](#)
