

INTIGRITI

Information sheet

# Intigriti's services

# Secure your assets with our community of ethical hackers

Our industry-leading platform enables you to pair always-on, real-world bug bounty coverage with on-demand PTaaS for security deep dives. Get ultimate testing flexibility powered by the crowd, unified on a single platform.

1

## Hacking community

Our community of ethical hackers<sup>1</sup> discover vulnerabilities and improve your security.

2

## Triage support

All reports are validated by our expert triage team<sup>2</sup> and managed via our platform.

3

## Security certifications

We support your compliance requirements and are ISO 27001 and SOC 2 certified<sup>3</sup>.

## How it works

Each of our programs include Intigriti's premier services, such as: onboarding management, customer success management, triage, community management, and our interactive SaaS platform. Whether you are launching a VDP, Bug Bounty, or PTaaS, setting up a crowdsourced security program with Intigriti is simple:

1

### Choose your program type

Our customer success team is on hand to help you **determine which program is best for you.**

2

### Start your journey

**You call the shots** by setting the terms of engagement and whether your bounty program is public or private.

3

### Boost your cybersecurity

Once your program is launched, you will start to **receive validated vulnerability reports** from our ethical hacking community.

4

### Optimize your program

We help you **optimize or modify** your VDP, Bug Bounty Program, and Pentest as a Service (PTaaS) **for long-term success.**

# More than a bug bounty platform

Our services can be divided into 3 main categories.

## 1 Bug Bounty Program / VDP

A **Bug Bounty Program** allows ethical hackers to continuously test your company's web applications, enterprise infrastructure, and other digital assets for security vulnerabilities for a financial reward.

A **vulnerability disclosure program (VDP)** is similar to a bug bounty but without a cash incentive for cybersecurity researchers. With no financial rewards to pay, VDPs can be a cost-efficient way of using the power of our ethical hackers to discover and fix security vulnerabilities.

Plus, with regulatory requirements set out by DORA, NIS2 and the CRA (Cyber Resilience Act), VDPs support organizations in staying compliant.

## 2 Penetration Testing as a Service (PTaaS)

**Penetration as a Service (PTaaS)** uses a cost-efficient and scalable 'Penetration Testing as a Service' model that allows you to access the expert skills of our ethical hacking community.

- **Time-boxed penetration** test with your desired methodology
- **Short lead time** ideal for working to a tight deadline
- **Simple to set up** with **real time updates** through our platform
- **Pay-for-value and triage** like bug bounty
- Collaborate in a **private or public** setting

## 3 Live Hacking Events

These high-profile events are fast, intensive testing periods where assets are picked apart by some of the most expert members of our ethical hacking community.

In addition to their ability to generate immediate results, **Live Hacking Events** create a huge amount of buzz and a multitude of PR opportunities.

- **High-profile events** that attract top hacking talent
- **Vibrant atmosphere** where companies and hackers can have fun
- **Intensive hacking** in a short period of time
- **Generate buzz** while finding bugs

## About Intigriti

Global crowdsourced security provider trusted by the world's largest organizations

Intigriti's bug bounty platform provides continuous, real-world security testing to help companies protect their assets and their brand. Our community of ethical hackers challenge our customers' security against realistic threats: we test in precisely the same way malicious hackers do.

## How vulnerability management works with Intigriti

- 1 Researcher tests and **searches** for a **vulnerability**
- 2 Researcher **submits** a **report** via Intigriti
- 3 Intigriti's **triage** begins **communication** with researcher
- 4 Intigriti's **triage** team applies **quality assurance** steps
- 5 In-scope, unique and well-written **reports** are **submitted** to client
- 6 Client **accepts** report, and **payment** is **automatically** processed

### 125.000+ researchers

More than 125.000 security researchers use Intigriti to hunt for bugs — and we're growing!

### 400+ live bug bounty programs

Companies of all sizes, and across multiple industries, trust Intigriti to launch their bug bounty program.

### GDPR compliant

We ensure compliance with the highest security and data security standards.

### Strong global presence

Intigriti has a strong global presence. In terms of hacker pay-outs, the 10 best performing countries are globally represented in North America, Europe and Asia. In 2025, vulnerabilities were submitted from more than 180 countries.

A vulnerability reported and fixed is one less opportunity for a cybercriminal to exploit. Ready to talk about launching your first bug bounty program? We're here to help you launch successfully.
